

CPCCWHS1001

Prepare to Work Safely in the Construction Industry (Whitecard) Online Delivery

COURSE OVERVIEW

- This course provides the Workplace Health and Safety (WHS) outcomes for induction to work safely in the construction industry and specifically on a construction site. This program is suitable for anybody in any industry who needs
- Unless you complete this national training program and gain the Construction Induction Card, you will find it very difficult to work or gain access to a construction site. The course will suit all construction and trade workers, civil construction workers, delivery drivers, site security officers and those who want to start a career in construction.
- You will gain a broad introduction into how to work safely on
- The course is fully accredited nationally recognised training.

FACT SHEET

ACSE has introduced a new learning method which would be used in exceptional circumstances, when face to face learning is inaccessible and online learning cannot meet the training and assessment requirements for a particular unit of competency, for example: **CPCCWHS1001 Prepare to work safely in the construction industry.**

ACSE has designed a new learning experience which will include trainer led zoom classes, to a maximum of 10 students during one session. These sessions will be face to face given students a real time live training session. ACSE will follow the following steps to make sure it delivers to the highest level of training and assessment:

- Advertising real time remote sessions, which will mention on the brochures the process we will follow for this session.
- At enrolment inform the students of the training and assessment method ACSE and the trainers will follow, students will also be given a LLN test to make sure they meet the LLN requirements for this level of assessment. Students will also be notified of the need to organise their own PPE for the training.
- 24 hours before training date, students will receive:
 - 1 An email which will include a zoom link of the training session
 - 2 A session plan detailing the times of each topic will be discussed
 - 3 Log in details to ACSE Learning Management System (LMS)
 - 4 Fact sheets and handouts needed for the session
 - 5 Admin and IT staff contact details.
- On the training date, the administration staff will commence the session, making sure all students won't be admitted till their ID have been confirmed then proceeded to the training session.
- Admin staff will make sure to grant access to any SafeWork auditor/ representative that might need to join the session.
- IT and Admin staff will be available during the session, to assist the trainer if needed to solve any technical issues that might occur.
- The session will also be recorded and stored according to ACSE policies and procedures and will be available for audit purposes.
- Students will receive information about their certifications and information about their licenses.
